MANAGEMENT COMMENTS

- Platform shows best performance in better dryland or irrigated environments.
- Yield leader in the 108 CRM class providing above average stalk and root strength allows for later harvest timing.
- Favorable option for fields with known Goss's wilt pressure.
- Good ear flex, performs best at moderate seeding rates.

ESTIMATED SEEDING RATE

Contact your Pioneer sales professional for additional information. Planting rate estimates provided for informational purposes only. Information here is provided for a hybrid family and not individual products. Product performance is variable and depends on many factors, such as soil type, management practices, environmental stress, disease, and pest pressure. Individual results may vary. Planting rate and seeding costs have been increased by 5% to account for early season stand loss.
