MANAGEMENT COMMENTS

- Strong yield potential across a wide range of environments.
- Provides good grain quality and test weight.
- Shorter plant stature makes this hybrid well suited for those interested in less plant residue and for reduced tillage applications.
- Manage with care in areas with a history of Fusarium ear rot.

REFUGE Integrated Refuge

- 95% (YGCB, HX1, LL, RR2)
- 5% (LL, RR2)

ESTIMATED SEEDING RATE

Contact your Pioneer sales professional for additional information. Planting rate estimates provided for informational purposes only. Information here is provided for a hybrid family and not individual products. Product performance is variable and depends on many factors, such as soil type, management practices, environmental stress, disease, and pest pressure. Individual results may vary. Planting rate and seeding costs have been increased by 5% to account for early season stand loss.
