

# GREAT HARVEST ORGANICS

2024 SEED GUIDE

# GREAT HARVEST ORGANICS

From day one in 1937, Beck's has made it a priority to offer farmers the choices they need to have a thriving operation. In 2002, Beck's introduced Great Harvest Organics, an organic line of products that provide farmers with elite genetics through our robust research program and relationships within the industry. The result? A high-yielding selection of certified organic corn, soybean, and wheat seed for your organic acres.

## PRODUCT SELECTION

Researching and testing hybrids and varieties to select the best products for organic farmers is a fundamental part of our business. Seed products grown for organic farmers have been specially selected to perform in organic conditions. Look to Beck's to continue bringing new products and market premium potential to organic farmers. Beck's has access to a broad source of genetics from different suppliers. We're able to test, select, and offer a unique combination of products that work for organic farmers.

## SEED TREATMENT ADVANTAGES AND BENEFITS

The Great Harvest Organics (GHO) seed treatment mixes are a combination of beneficial ingredients which are OMRI Listed® and provide unique benefits for corn and soybeans. It's a great way to get the best possible start for your organic crop and comes standard on all GHO corn and soybean seed.

- Biological bio-stimulant and bio-catalyst to improve plant health
- Products are safe to handle and safe for the environment
- Flow well through the planter
- Increased early-season vigor of seedlings to help them outgrow insect pests and disease

## CORN AND SOYBEAN TREATMENT – OBT 2001 WP\* AND BIOST® ORGANIC VPH 9.0\*

OBT 2001 WP by Osprey Biotechnics and BIOst® Organic VPH 9.0 by Albaugh, LLC is applied to all certified organic and non-GMO corn as well as certified organic soybeans. Both products are OMRI Listed.

OMRI Listed Certificates for all seed treatments can be found here: [BecksHybrids.com/Products/Seed-Treatments/Great-Harvest-Organic-Seed-Treatment](https://BecksHybrids.com/Products/Seed-Treatments/Great-Harvest-Organic-Seed-Treatment)

# CERTIFIED ORGANIC CORN

Beck's offers certified organic corn hybrids with exciting performance and elite genetics ranging from 88- to 115-day relative maturities. We select only the best-performing hybrids for the organic environment, combined with the highest yield potential, and place them specifically for your farm.

## 100% FREE REPLANT POLICY

If there is a need to replant a field of Great Harvest Organics branded seed corn or soybeans, as determined by a Beck's or Great Harvest Organics representative, Beck's will furnish the seed and royalties FREE. Beck's will attempt to provide the same product for replant as the customer originally planted. Substitutions of some products may be necessary. Replant must be planted in the same crop year as originally planted. In the event that elite alfalfa needs replanting, Beck's will provide replant seed one time during stand establishment. Great Harvest Organics branded wheat is not eligible.

# CERTIFIED ORGANIC SOYBEANS

Great Harvest certified organic soybean seed varieties offer organic farmers the performance of conventional soybeans in a certified organic package. With relative maturities ranging from 2.4 to 4.2, these varieties have been selected to offer the performance and flexibility you need for your soil types.
